PSM Messenger Emergency Notification Software

Fast, effective, and accessible notification for

- Colleges and Universities (on-campus and off-campus locations)
- Government Agencies
- Military Installations
- Enterprise Communications
- Service providers offering residential emergency notification

PSM Messenger is a software application that provides a fast and effective means for sending emergency and other time sensitive messages to specific locations, groups of people, or targeted individuals. Messages can be delivered by a variety of end-point devices, including ClassCo's PSM585 Emergency Notification Device, fixed line and mobile phones, SMS, EMAIL, and siren/alarm systems.

Using PSM Messenger, officials can enter and manage recipient data as well as create custom messages. Messages can be sent directly to targeted recipients immediately, or can be scheduled to be sent at a later or regular time. PSM Messenger provides both local and remote access via a secure web interface, and notification processes can be activated by web and email.

Features

- Sends messages over both PSTN and IP/LAN/VOIP networks
- Delivers messages to PSM585 Emergency Notification Devices, fixed line and mobile telephones, SMS, EMAIL, siren and alarm systems
- Collects and records message delivery acknowledgements from PSM585 devices
- LINUX server platform
- Secure web interface for local and remote access
- Email processor for delivering emails to telephones and PSM devices
- Import of message recipient data
- Notification Detail Record (NDR) generation with ACK status
- On-site and Hosted service capability

Operates in conjunction with:

ClassCo's PSM585 Emergency Notification Device
